## **WHITEPAPER**

# **EXTERNITY**

**Externity (EXY) is a community-based DeFi token built on the Binance Smart Chain. Our goal is to stop using fossil fuels and switch to renewable energy.**

# EXTERNITY

## What?

Fossil fuels are buried remains from plants and animals from millions of years ago. E.g.

- coal, oil or natural gas.

## How?

These buried remains from plants and animals are under such a high pressure for millions of years that it will turn into coal, oil or natural gas.

## Why?

Global warming is a big disaster and not only affects our ecosystem, but also increases the amount of extreme weather events. – We care about our planet

## When? -

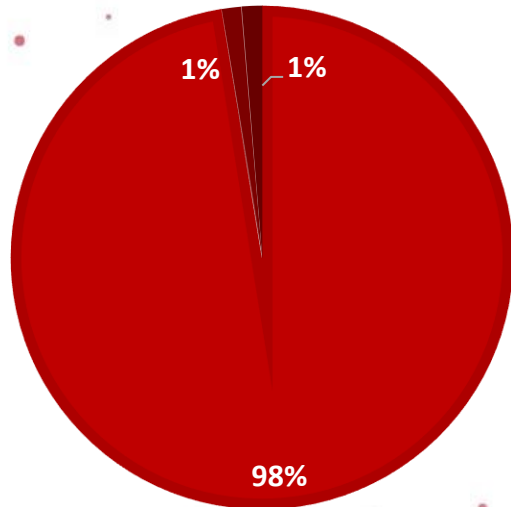

When Externity is stable we'll start by investing into the renewable energy industry.

# ROADMAP

## PROJECT LAUNCHED

Our project "Externity" launched on May 11, 2021 and was developed with ❤️ by Tim van Kortenhof.

## EXTERNITY TRADING APP

Later this year we're going to begin on making an official Externity trading app. 📱

It will have a very basic UI. So everyone, even beginners can buy Externity with just 2 clicks on their phone. 📱

(no exact date for release)

Q3 2021

## COINMARKETCAP LISTING

Very soon we'll be listed on CoinMarketCap and from there on we are not only able to expand in a huge speed across the globe 🌍, but Externity's price and logo will be observable on PancakeSwap 🍷 and TrustWallet 📱.

Q4 2021

## EXCHANGE LISTING

Beginning next year we'll do our best to get listed on several famous exchanges. This will not only increase its holders, but Externity's price will skyrocket 🚀 like never seen before. 🤪
